

ANNUAL INDEX

VOLUME 22

1988

KEY

Number in parenthesis is issue number; other number is page number.

(127)100 = Issue 127, Page 100

Issue 127 = February, 1988

Issue 128 = April, 1988

Issue 129 = June, 1988

Issue 130 = September, 1988

Issue 131 = October, 1988

Issue 132 = December, 1988

PROFESSIONAL COURSES

Buses & LANs, Part 1—Introduction, John R. Purvis, St. Edward's University (130)170

Buses & LANs, Part 2—8-Bit Buses, John R. Purvis, St. Edward's University (131)117

Control System Modeling, Part 5—Through and Across Variables, Clarence deSilva, Ph.D., University of Cambridge (127)120

Control System Modeling, Part 6—State Models from Linear Graphs, Clarence deSilva, Ph.D., University of Cambridge (128)122

Control System Modeling, Part 7—Bond Graphs, Clarence deSilva, Ph.D., University of Cambridge (129)130

Control System Modeling, Part 8—Transfer-Function Models, Clarence deSilva, Ph.D., University of Cambridge (130)157

Control System Modeling, Part 9—Frequency Domain Models, Clarence deSilva, Ph.D. (131)131

Dimensional Metrology, Part 6—Electro-Optical Displacement Measurement, Daniel P. Hemperly, Optron Corp. (127)117

Dimensional Metrology, Part 7—Displacement Measurement by Fiber Optics, Curtis Kissinger, MTI, Instruments Div. (128)117

Dimensional Metrology, Part 8—Dimensional Measuring Machine, Stephen L. Fix, Sheffield Measurement (129)125

Dimensional Metrology, Part 9—Dimensional Gaging Using Laser Triangulation, David R. Wiese, Selective Electronic, Inc. (Selcom) (130)179

Dimensional Metrology, Part 10—The Metrology Crisis, Walter J. McGee, National Standards Educators Association (131)142

Dimensional Metrology, Part 11—X-Ray Microfluorescence™ Spectroscopy, David Wherry, Kevex Instruments (132)124

Forth, Part 12—Number Bases, David Penz, P.E. (127)124

Forth, Part 13—Scaling, David Penz, P.E. (128)129

Forth, Part 14—Disc Files, Editors and Screens, David Penz, P.E. (129)142

Forth, Part 15—File Operations, David Penz, P.E. (130)174

Forth, Part 16—Flow of Control, David Penz, P.E. (131)126

Forth, Part 17—Conditional Execution, David Penz, P.E. (132)118

Personal Computing, Part 17—Introduction to a Laptop Pico, Milton H. Aronson (127)128

Personal Computing, Part 18—Cursor Control with Text, Milton H. Aronson (128)132

ARTICLES

Air Flow Monitor, Charles L. Wooddell, Leslie Controls, Inc. (128)154

Analog to Digital Conversion, Roger W. Lockhart, Dataq Instruments, Inc. (132)160

Balls Solve Tough Flow Control Problems, Jeff Comstock, Industrial Tectonics, Inc. (128)161

Calibration Software, John J. Kope, California Instruments Corp. (132)153

Contact Enhancement, Robert F. Bradley, Micro-Circuits (131)167

Control System for Air Separation Plant, William E. Sweeney, Union Carbide (132)156

Coriolis-Based Custody Transfer System, Brian Hoover, Micro Motion, Inc. (131)164

Coriolis Mass Flow Measurement, Dr. Alan Young, EXAC Corp. (130)195

Data Acquisition & Control Boards, Lon Hocker, Onset Computer Corp. (127)139

Data Acquisition System, Gabor Kiss, Bell Communications Research, Inc. (130)202

Digital Panel Meters, Harold Weiss, Newport Electronics, Inc. (132)127

DSO—Digital Storage Oscilloscope, Ken Pine, Dolch American Instruments Inc. (127)160

Electronic Imaging, Peter Keller, Tektronix, Inc. (132)164

EMI/EMS, H.H. "Mac" McCarley, Sundstrand Data Control (127)135

Fault Tolerant Control, Glen B. Alleman, Triconex Corporation (128)170

Force Measurement—A New Approach, Walter E. Jacobson, Revere Corporation of America (127)157

Gas Flow Control with Thermal Mass Flow Measurement, Ralph E. Rutherford, Precision Flow Devices, Inc. (132)132

Humidity Calibration, Brad Bennewitz, Thunder Scientific Corp. (130)216

Inductive Sensors, Dayle R. Smith, Smith Research & Technology, Inc. (129)176

Intelligent Digital Pressure Transmitters, Donald W. Busse, Paroscientific, Inc., and Dr. Richard B. Wearn, Jr., Well Test Instruments, Inc. (127)162

1988 ANNUAL INDEX **Continued**

Laser Pyrometry, Dr. Alexander Stein, Quantum Logic Corporation (130)184

Mass Flow, Urs Endress, Flowtec AG (128)150

Microprocessor-Based Transmitters, Stanley L. Whitman, Honeywell Inc./Industrial Controls Div. (127)145

Monitoring of Combustible Gases, John W. Small, Astro International Corp. (129)148

Multiple High-Temperature High-Shear Capillary Viscometer, Robert E. Manning, Ph.D., and Wallis A. Lloyd, Ph.D., Cannon Instrument Company (129)171

Nanomover™, Marcus Noble, Melles Griot (128)139

Operator Information Systems, Bjorn J. Gruenwald, Advanced Computer Applications, Inc. (128)164

Operator Interface Terminals, Ronald W. Howard, Xycom, Inc. (130)192

Personal Computers, Richard Walter, P.E., HEM Data Corporation (128)155

Photoelectric Sensing, Hal Philipp, BSEE, Philipp Technologies Corp. (131)152

Piezo Film, J. Victor Chatigny, Pennwalt Corporation (129)152

Piston Gauges, Karl Kurtz, DH Instruments, Inc. (132)168

Platinum RTD Calibration, Horst Seperant, Azonix Corporation (127)150

Potentiometer Testing, Craig Welch, M.S., and Theodore L. Laufenberg, M.S., Forest Products Laboratory (132)140

Programmable Control—Problems Associated with PC Scan Time, R.S. Black, Duke Power Co. (130)188

Programmable Controllers Protect Jet Fuel Pipeline, David L. Buckles, Pride Refining, Inc. (132)144

RT-DAS, Frank M. Bunton, Talton/Louley Engineering (131)161

RTU—Remote Terminal Unit, Arthur R. Oberhofer III, Sutron Corporation (130)199

Rupture Discs, Stanley P. Sigl, Jr., Fike Corporation (131)148

SCADA-VSAT, R.Gary Mesch, Nova-Net Communications, Inc. (131)156

Sensors and AI: The Sixth Sense, Dr. Mona Abdelrahman, Micro Switch Div./Honeywell (128)146

Smart Digital Transmitters—Applications in Data Acquisition, David D. Dutile, DGH Corporation (132)137

Smart Motor Drive, Paul Emerald, Sprague Electric Co. (128)148

Solenoid Valves, Rick Smith, Burkert Contromatic Corp. (129)167

Straightness and Roundness Measurement, William E. Drews, Rank Precision Industries, Inc. (128)162

Strain Gages and Brittle Coatings, 1938-1988, Peter K. Stein (127)138

Strain Gages and Brittle Coatings, 1938-1988 (128)169

Thermometer Calibration, Jacquelyn A. Wise, NBS, and Robert J. Soulen, Jr. (130)206

Time Dissemination, Gary Stephens, Leitch Video of America, Inc. (128)165

Triboelectric Flow Measurement, Ronald L. Dechene, Auburn International, Inc. (127)130

Two-Wire Field-Mounted Transmitters, Robert J. Rosenberg and Thomas R. Crumlish, Transmation, Inc. (132)148

Ultrasonic Level Sensing, Kneal Hollander, Kistler-Morse (128)134

AUTHORS

Abdelrahman, Dr. Mona, Micro Switch Div./Honeywell, Sensors and AI: The Sixth Sense (128)146

Alleman, Glen B., Triconex Corporation, Fault Tolerant Control (128)170

Aronson, Milton H., Personal Computing, Part 17—Introduction to a Laptop Pico (127)128

Aronson, Milton H., Personal Computing, Part 18—Cursor Control with Text (128)132

Bennewitz, Brad, Thunder Scientific Corp., Humidity Calibration (130)216

Black, R.S., Duke Power Co., Programmable Control—Problems Associated with PC Scan Time (130)188

Bradley, Robert F., Micro-Circuits, Contact Enhancement (131)167

Buckles, David L., Pride Refining, Inc., Programmable Controllers Protect Jet Fuel Pipeline (132)144

Bunton, Frank M., Talton/Louley Engineering, RT-DAS (131)161

Busse, Donald W., Paroscientific, Inc., and Dr. Richard B. Wearn, Jr., Well Test Instruments, Inc., Intelligent Digital Pressure Transmitters (127)162

Chatigny, J. Victor, Pennwalt Corporation, Piezo Film (129)152

Comstock, Jeff, Industrial Tectonics, Inc., Balls Solve Tough Flow Control Problems (128)161

Crumlish, Thomas R. and Robert J. Rosenberg, Transmation, Inc., Two-Wire Field-Mounted Transmitters (132)148

Dechene, Ronald L., Auburn International, Inc., Triboelectric Flow Measurement (127)130

deSilva, Clarence, Ph.D., University of Cambridge, Control System Modeling, Part 5—Through and Across Variables (127)120

deSilva, Clarence, Ph.D., University of Cambridge, Control System Modeling, Part 6—State Models from Linear Graphs (128)122

deSilva, Clarence, Ph.D., University of Cambridge, Control System Modeling, Part 7—Bond Graphs (129)130

deSilva, Clarence, Ph.D., University of Cambridge, Control System Modeling, Part 8—Transfer-Function Models (130)157

deSilva, Clarence, Ph.D., Control System Modeling, Part 9—Frequency Domain Models (131)131

Drews, William E., Rank Precision Industries, Inc., Straightness and Roundness Measurement (128)162

Dutile, David D., DGH Corporation, Smart Digital Transmitters—Applications in Data Acquisition (132)137

Emerald, Paul, Sprague Electric Co., Smart Motor Drive (128)148

Endress, Urs, Flowtec AG, Mass Flow (128)150

Fix, Stephen L., Sheffield Measurement, Dimensional Metrology, Part 8—Dimensional Measuring Machine (129)125

Gruenwald, Bjorn J., Advanced Computer Applications, Inc., Operator Information Systems (128)164

Hemperly, Daniel P., Optron Corp., Dimensional Metrology, Part 6—Electro-Optical Displacement Measurement (127)117

Hocker, Lon, Onset Computer Corp., Data Acquisition and Control Boards (127)139

INDUSTRY FORUM OPINIONS

- Anderson, Don, Smith Meter Inc./MOORCO, Revolutionary Change Awaits the Coriolis Mass Meter in the 1990s (130)275
- Arslanian, Russ, Meriam Instrument/Div. Scott & Fetzer, Both Manometers and Digital Pressure Indicators Have Their Roles (131)209
- Baumohl, Joseph, Controlotron Corp., Clamp-On Transit-Time Ultrasonic Flowmeters Now Out-Perform Conventional Intrusive Flowmeters (131)267
- Birdsey, Robert, Dresser Industries, Control Instruments Div., Pressure Switches are Here to Stay (130)291
- Blagrove, John, Bailey Controls, "Smart" Transmitter Market Continues to Grow (129)279
- Borsi, Dr., Siemens Energy & Automation, Trends for PLCs—The Impact of Technology (130)308
- Brimbal, Michel, Gould Inc., From Direct Recording to Results Reporting (129)219
- Burrit, Harry, Modicon Inc., Co-Existence or Survival of the Fittest? (130)310
- Byrne, Randy, Haake Buchler Instruments Inc., Viscometry/Rheology Becomes More Important in Process Industries (129)281
- Carlson, Don, Action Instruments, Trends in the Transmitter Industry (129)264
- Cooper, Ed, Power-Science Industries, Power Line Dropouts Can Be Destructive (132)285
- Deal, J. Allen, Brooks Instruments Div., Turbine Flowmeters Gain Acceptance in New Applications (127)181
- Ehrenfried, Albert D., Metritape Inc., 1988—The Year for Tailored Design (128)230
- Frank, Douglas E., Thermo Electric Co., Inc., As Temperatures Increase, So Do the Problems! Some Solutions (129)245
- Ginesi, Donald, Combustion Engineering, DP Flow Elements Meet Tough User Demands (130)236

1988 ANNUAL INDEX **Continued**

- Gordon, Gerald, Teledyne Gurley, Square Waves and Pulses: A Clarification (130)246
- Groetsch, John, Monitek Technologies, Inc., Average Flowrate Determination in Open Channels (132)240
- Gruskos, Richard, Hoffer Flow Controls, The Turbine Flowmeter's Growth Is Fostering Additional Support (127)181
- Guerrieri, Matt, Raytek Inc., Infrared Thermometers Become Smarter, Cheaper, and More Widely Used (127)264
- Howard, Ron, Xycom, Inc., Industrial Software User-Interface Follows Office Software Trends (132)226
- Jeffrey, Hal, Hersey Measurement Co., Flowmeter Misapplication Is Too Common (127)189
- Jergensen, Ivar, Graphic Controls, Chart Recorders—Where are They Headed? (129)235
- Jones, Johnny, MagTech, Updating Level Control (128)219
- Kahn, David, Kahn Instruments, Hygrometers Are Trending to Portability and Interchangeability (127)278
- Kapplet, Eric, Smith Meter Inc./MOORCO, Revolutionary Change Awaits the Coriolis Mass Meter in the 1990s (130)275
- Kelly, Fred III, Gould Inc., Systems Div., A Comparison of Direct-Writing Techniques (128)212
- Khalifa, Mohamed Dr., Neptune Measurement Co., The Old Sunken Stream Effect Can Help the Vortex Shedder Tolerate Installation Discrepancies (129)290
- Kitamura, Kenzo, Mitsubishi Intl. Corp., Shibaura Electronics, Absolute Humidity Control Makes Possible Better Test Chambers (127)270
- Kussmann, John, Vaisala, Inc., The Humidity Instrument Marketplace is in the Hands of the Professional Sales Engineers (127)279
- Lally, Jim, PCB Piezotronics, Inc., Accelerometer Calibration—Is it Credible? (132)180
- Laird, Christopher, Smith Meter Inc./MOORCO, New Metering Principles Cannot Compare To The "Good Old" P.D. Meter (131)239
- Lewis, Joseph, The Foxboro Company, The Future of Flow Measurement is Digital (130)229
- Marullo, Michael, Technical Marketing Consultants, SCADA Takes On New Dimensions—and Might Emerge as the Generic Platform for Distributed Control (128)193
- McIntire, Byron G., Soltec Corp., Servo Recorders: Complex Technology vs. Simple Operation (132)251
- Morrison, Michael, EG&G Chandler Engineering, Millions of Dollars Are Lost Every Year Due to Inaccuracies in Pressure Measurement (132)206
- Noviski, Victor, Namco Controls, Laser-Scanning Sensors to Take the Place of Machine Vision in Many Applications (131)246
- Ouwerkerk, Gary, Montedoro-Whitney Corp., Improving Open Channel Flow Monitoring Accuracy (132)239
- Peterson, Anne, Hedland, Div. of Racine Federated Inc., New Flowmeter Design (129)210
- Pigg, Bradley, Pressure Systems, Inc., Electronic Pressure Scanning: "Fulfilling Different Needs" (130)238
- Rebeck, Alan, Transtector Systems, Terminology in Power Correction is Often Misleading (132)287
- Robinson, Ivan, Robinson-Halpern, Potentiometric Pressure Transducer Market is Under Attack (127)191
- Robinson, Ivan, Robinson-Halpern, Innovative Designs will Foster LVDT Pressure Market Growth (130)313
- Rogowski, Ed, Thermo Electric, Changing Times in the Temperature Industry (128)250
- Rossiter, Edward, Acurex Corp., Calibrate Your Vendor To Realize Stated Accuracies (127)200
- Roushey, Jack, Brooks Instruments Div./Emerson Electric, Rotameters Stress Simplicity and Availability for Future Success (130)319
- Rowe, Richard D., Honeywell Industrial Controls, PLC Trends (130)294
- Schuller, Ed, Drexelbrook Engineering, RF Level Sensors Have Unique Advantages (128)241
- Shapiro, Bernard, Dynisco, Strain-Gage Pressure Transducer Trends (128)280
- Sieck, Ronald, Micro-Switch/Honeywell, Demand for Proximity Sensors Increases (131)246
- Sinclair, Mark, Modutec CMI, DPMs—Keeping Pace with Technology (132)224
- Smith, Grant Maloy, Astro-Med Inc., Linear Array Recorders—A Significant Step Forward (129)216
- Smothers, Brian, Acculex, A Metrabyte Co., Digital Panel Meters: Reliable, Low-Cost Versatile Instrumentation for the Next Decade (132)216
- Speed, Kevin, Jordan Valve Div., Richards Industries, Regulator Industry Sees Improvement in Seat Materials (129)202
- Spindler, Jerry R., Esterline Angus Instrument Corp., Trends in Power Measurement (128)216
- Spivack, Herman, West Coast Research, Torque Applications Are Expanding Especially in Low-Torque Areas (127)195
- Steidinger, Maryann, Pulnix America, Inc., "Super Sensors" Ubiquitous in Industrial Market (131)247
- Stuhr, Charles, Eaton Corp./Logic Control Div., Cost-Sensitive Solutions to Factory Automation: Micro PLCs with Computer Interface (130)294
- Sundt, Peter, Metrix Instrument Co., Two-Wire Transmitters Simplify Vibration Monitoring (132)190
- Taylor, James, Ravenfield Designs Limited, Viscosity Standards Should be Traceable to NBS or NPL (129)287
- Warner, Eliot, Rotek Instrument Corp., Transferring the Watt and What It Means (132)258
- Weiss, Harold, Newport Electronics, Microprocessing Chips are Changing All Counting/Totalizing Fields (128)176
- Wirth, Brian, Sensym Inc., New Low-Cost Accelerometers (132)190
- Wright, John, Marsh-McBirney, In-Situ Verification of Flowmeter Accuracy (132)236
- Zavodny, Bruce, Yokogawa Corp. of America, X-Y Recorders Still Serving User Needs (131)276
- Zavodny, Bruce, Yokogawa Corp. of America, Servo Recorders—Continuing to Improve (132)242
